COURSE OF STUDY.

Classes are formed *every term* in those studies prescribed in the tabular view, for the first and second terms of the first year. There are also classes in Algebra, in Grammar, and in U. S. History, nearly every term.

The Divisions I, II, III. etc., in the foregoing table, are made with reference rather to the studies in charge of different teachers than to the strictly logical groupings of subjects. The annexed SYLLABUS is intended as a key to the table.

DIVISION I.

ELEMENTS OF PEDAGOGY. *First Term.* This class meets on two days in the week. During the term they commit to memory about fifty principles of Pedagogy, after having them enunciated and discussed in the class room. In this way, the students are better prepared for intelligent observation of the actual work of the Primary School.

OBSERVATION IN THE MODEL SCHOOL. *Second Term.* This includes a careful study of the operations of the Primary School, together with actual instruction by the Training Teacher, in the management of classes and in the principles and methods of teaching young children. The observers are required to take notes of what is done and said, and to write them out carefully in their diaries, which diaries are inspected and marked by the teacher. Both the subject matter and the composition of the diaries are criticised. Every student entering the Normal Department is strictly required to take this work.

THEORY AND PRACTICE OF TEACHING. *Third Term.* The following are some of the most prominent topics of discussion: 1.—EDUCATION: What is it? Its relation to Learning; its mode, in respect to the body, the mind, and the conscience. 2.—THE MIND: Its essential unity; classification of its powers; order of their development; cultivation of the senses, the memory and the reason. 3.—THE TEACHER: His motives; his preparation; his manners; his habits of dress, action, thought and speech; his health. THE SCHOOL: 4.—The house and its surroundings, furniture and apparatus; organization of a school; first day's work; classifying; the programme, grading, etc. 5.—SCHOOL MANAGEMENT: Principles of government; punishments; making rules; the characteristics of a teacher which are

essential to good management. 6.—INSTRUCTION: What is a recitation? Assigning lessons; hearing lessons; use of text-books; exactness and promptness in recitation; helping pupils; method of questioning, etc. Text-book: HEWETT'S PEDAGOGY.

PSYCHOLOGY. *Fourth Term.* Mental science as compared with other sciences. Definitions and Classification of the Mental Powers Consciousness. Attention. Conception. Sense-perception. Theories concerning Sense-perception. Opinions of different philosophers on this subject. Qualities of Bodies as related to Sense-perception. Functions and Culture of the different Senses. Memory; its nature, use, and methods of culture. Laws of Memory. Effects of disease on Memory. Imagination; its relation to other faculties. Uses and abuses of imagination. The Reflective Power. Abstraction. Judgment. Analysis. Synthesis. Classification. Reasoning by induction; by deduction. Reasoning from testimony; from experience; from analogy. The Syllogism; its uses; its laws. All these topics are studied with special reference to their bearing on the work of teaching. Text Book: HEWETT'S PSYCHOLOGY.

PHILOSOPHY OF EDUCATION. *Eighth Term.* This includes a study of *Rosenkranz's Pedagogics, as a System.* The study is made as complete as the brief time will allow, but a small part of the book is omitted.

TEACHING IN THE MODEL SCHOOL. Each pupil, after the first year, is required to teach in the Model School, subject to the supervision and criticism of the training teachers. He takes entire charge of a class in a single study, and is responsible for both the instruction and the discipline. Four terms of such work is the amount usually required.

During the Senior Year the class have exercises in Illustrative Teaching and in the Criticism of Pedagogical Literature, under the President. (See page 40.)

The Senior Class also acquaint themselves with those parts of the School Law that pertain to the duties and responsibilities of the teacher.

DIVISION II.

GRAMMAR. *First Term.* Analysis. Determination of the essential elements of the sentence through an examination of the nature of the thought, or judgment. How modification of elements arises from the expression of thought. Extensive drill in distinguishing principal and subordinate elements and discovering their relations through the analysis of sentences.

Professional.—Language-work in Primary grades, oral and written. Discussion of methods, matter, and quantity of work.

Third Term. Etymology. Further consideration of the modification of principal and subordinate elements of the sentence, through inflection, etc. Constant reference to the thought itself in the explanation of forms.

A thorough-going application of what is learned in etymology, to Whittier's "Snow-Bound," or to an equivalent poem, together with a skeleton-analysis of the same. Text Book: GREENE'S.

Professional. Organization of language-work through Intermediate and Grammar grades. Proper function of *form* and *thought* in this course. Genetic arrangement of composition exercises.

READING. *First and Second Terms.* Analysis of words according to their elementary sounds. Articulation and pronunciation. Compass and Flexibility of voice. Stress and Emphasis. Pauses. Inflections. Analysis of words according to their Derivation and Formation. Analysis of thought. Practice in elocution. Text Book: EDWARDS'S.

RHETORIC. *Fifth Term.* Diction, including Purity, Propriety, Precision, Clearness, Unity, Strength, and Harmony. Rhetorical Figures. Style and its varieties. Original composition during the term. Text Book: A. S. HILL'S.

LITERARY CRITICISM. *Sixth Term.* Critical examination of the style of some of the best authors in the English Language, with reference to Thought, Diction, Sublimity, Beauty, and Rhetorical Figures. Original Composition during the term. Same TEXT BOOK.

ENGLISH LITERATURE. *Seventh Term.* Sketches of the leading authors in each department, from the time of Chaucer, with critical study of selections from the same. Text Book: SHAW'S.

SHAKESPEARE AND THEMES. *Ninth Term.* A critical study of Shakespeare's plays—HUDSON'S Edition. Orations and Essays.

SPELLING. Each pupil is required to spell every day, by writing; a term-standing of 95 *per cent.* excuses from further practice.

DIVISION III.

ARITHMETIC. *First Term.* Topics to Percentage. The work is conducted in such a way as to include primary arithmetic. Definitions and analyses are derived from operations with objects.

Second Term. Straight-line Analysis; Ratio; Simple and Compound Proportion; Percentage and its applications to Gain and Loss, Commission, Insurance, Taxes, Duties, Interest, Discount, Partnership, Equation of Payments, Average of Accounts, and Exchange. Extraction of the Second and Third Roots. Text Book: WHITE'S COMPLETE.

ALGEBRA. *Third and Fourth Term.* WENTWORTH'S Complete Algebra.

GEOMETRY. *Fifth Term.* Books I to IV inclusive, WELLS'S Geometry.

Sixth Term. Books V to IX inclusive, WELLS'S Geometry.

Sixth Term (Optional.) Plane Trigonometry, with its application to Land Surveying; Leveling; Variation of Magnetic Needle.

PHYSICS. *Seventh and Eighth Term.* AVERY'S Natural Philosophy. Laboratory work throughout the course.

ASTRONOMY. (Optional.) *Eighth Term.* RAY'S Elements of Astronomy to Chapter XV. Study of Constellations visible from December 1, to March 1. Text Book: BURRITT'S GEOGRAPHY OF THE HEAVENS.

BOOK-KEEPING. *Ninth Term.* BRYANT'S COMMON SCHOOL.

DRAWING. *Fourth Term.* General Principles of Drawing. Study based upon the three Divisions—Construction, Representation and Decoration. Work outlined for the Public Schools.

Ninth Term. Study of form as to Outline, and Light and Shade.

Practice in Illustrative Blackboard Drawing. Brief study of Historic Ornament.

DIVISION IV.

GEOGRAPHY. *First Term.* General Principles of Geography. A full course marked out and the work for each grade indicated. Special attention given to methods of teaching in the lower grades. Study of North America as a whole made a model for the study of the other continents. Brief study of British America, Mexico, Central America, and the West Indies. Study of the United States as a whole. A more thorough study of each of the States and Territories. Execution of sketch maps of the States and of a few of the principal cities.

Second Term. Brief study of the countries of Continental Europe, Asia, Africa, and Australia. Sketch map of the principal countries of Europe and Asia, showing their principal Mountains, Rivers, and Cities. More thorough study of Great Britain as a model. Brief study of the countries of South America. Astronomical Geography; Latitude and Longitude; Day and Night; the Seasons, etc. Text Books, optional.

PHYSICAL GEOGRAPHY. *Sixth Term.* Review of the Earth's Form, with a sketch of the Theory of its Origin. Physical Life of the Earth. Temperature; Atmospheric and Marine Currents; Rains, and the Effects of Climatic Conditions on Vegetable and Animal Life. Historical view of the Earth; the Relations of its Forms and Physical Life to the Development of the Human Race. Text Book: GUYOT'S EARTH AND MAN.

UNITED STATES HISTORY. *Third Term.* Geography regarded as a basis for the study of History. Voyages, Discoveries, and Indian Tribes. Colonial History, French Wars, and Revolution. Brief History of the successive Administrations from Washington's up to the War of Secession, in 1861. Founding and Progress of the States in the West and Southwest. History of the War of Secession. History of the Nation since the War of Secession. Matter to be taught in the different grades pointed out, and methods of teaching indicated. Text Book: BARNES'S BRIEF HISTORY.

ANCIENT HISTORY. *Fifth Term.* Early Asiatic Nations. Grecian History. Roman History. Methods of Teaching. Text Book: SWINTON'S OUTLINES.

MEDIAEVAL HISTORY. *Seventh Term.* Text Book: SWINTON'S OUTLINES.

CIVIL GOVERNMENT. *Fourth Term,* DR. ISRAEL W. ANDREWS'S text book is used. Particular attention is given to the text of the Constitution; and the exposition and history, as presented by the author, receive all the attention that time will permit. The State Constitution is studied in connection with that of the Nation.

DIVISION V.

ZOOLOGY. *Fourth Term.* Dissection of Types. Grasshopper, Crayfish, Earthworm, Clam, Snake, Pigeon, Squirrel, Starfish; Microscopic examinations of Protozoans, Amoeba, Paramecium, Vorticella. Methods and Principles of Classification learned by Comparison of Animals, noting Resemblance and Difference in Plan of Structure and Development. Descriptions and Drawings kept in permanent note-book. Examination of specimens in Museum for the purpose of learning Structure and Relationship. Charts of Structure of Typical Animals. Study of Habits of Live Animals kept in Cages and Aquaria. Determination of Species of Mammals, Birds, Reptiles, Batrachians and Fishes, by the use of Jordan's Manual of the Vertebrates. Text Books: PACKARD'S and COLTON'S.

HUMAN PHYSIOLOGY. *Fifth Term.* General view of the Structure and Functions of the body. Students dissect a cat or rabbit, paying especial attention to the organs of Digestion, Circulation and Respiration, Muscles and Nervous System; Heart, Lungs, Kidney, Larynx of Sheep; Eye of an ox. Study of Human Skeleton and Manikin. Demonstration of more difficult points on cat or dog. Action of Muscles and Nerves, Reflex action of the Spinal Cord, and Circulation of Blood shown in frogs. Experiments on, and observation of, Respiration and Circulation in the human body. Nine Microscopes and a large number of well-selected slides illustrating normal and pathological Histology. Occasional evening lectures illustrated by calcium-light lantern views. Laws of Hygiene. Text Book: MARTIN'S Human Body—Briefer Course.

BOTANY. *Sixth Term.* Seeds—Parts; Kinds; Germination. Plants—Food; Growth; Fruitage; Uses. Principles of Classification, and rules for spelling, pronouncing, and capitalizing the names of the orders, genera and species. Familiarity is acquired with twenty-five orders from the analysis of plants, and from the study of shrubs and trees in the University Grounds. Herbarium of twenty species required. Students have access to twenty botany-presses, and to one good dissecting microscope for plant analysis, and the study of plant structure. Drawings and descriptions made in permanent note-books. Text Book: GRAY'S SCHOOL AND FIELD BOOK.

CHEMISTRY. *Eighth Term.* Twenty elements. Symbols; Atomic Weight; Properties, chemical and physical; Laws of Combination; Formulæ;

Chemical Equations; Reactions; Compounds; Gases—their Liberation; Collection; Management; Combination; Properties. Salts—Properties; Composition; Decomposition; Detection. Knowledge of fifty Compounds. Metals—Properties; Appearance; Detection; Commercial Importance. Organic Chemistry—Food of Plants; Formation of Organic Matter. Qualitative Chemistry is associated with General Chemistry in all the work. All students are furnished with complete apparatus for the fullest experimentation. Each student becomes acquainted with the construction and management of four different kinds of batteries. Power is acquired to manage the compound blow-pipe, calcium light, and electric apparatus. Students do the work. The workers in Chemistry now have the exclusive use of a well-equipped laboratory in the basement. Students of the University and Teachers in the Public Schools taking such science work as belongs to the regular Normal course of study, are at no expense for chemicals or apparatus. To such as wish to take extra or special work in this department, tuition and a fee for incidentals will be charged. Text Book: AVERY'S.

TRAINING WORK.

By referring to the Tabular View of the Course of Study in the Normal School, p. 39, it will be seen that all the students in this department are expected to give an hour daily, during their second term, to "observation" of work in the Primary School. The third term calls for the study of "Theory and Practice of Teaching." The opening of the second year marks the beginning of "Training Work." Each student is now introduced to one of the classes in the Model School (of primary, intermediate, or grammar grade), for the management and progress of which, in one branch of study, under the direction of the principal training-teacher or one of his assistants, the student is held responsible during the term.

The work to be done is laid out with more or less minuteness of detail according to the nature of the study, the grade of the pupils to be taught, and the apparent needs of the pupil-teacher. The progress of the children, the pupil-teacher's manner with his class, his assignment of lessons, and his devices for gaining and holding the attention are matters of frequent observation by the designated training-teacher, to whom, by "returning the call" before the school day closes, the young teacher gives an opportunity for criticism, whether favorable or adverse.

As an aid to the training-teacher in justly estimating the pupil-teacher's clearness of purpose and directness of aim, the latter is required to present to the former, at stated intervals, an outline of the work to be done, together with a statement of the method proposed in introducing any new topic.

At least once each week, class meetings of pupil-teachers are held, one of the training-teachers presiding. These meetings give opportunity for illustrative teaching, for studying the approaches of new topics, discussing methods, relating observations and experiences, and in various ways heightening the *esprit de corps*.

In addition to the four terms of successful teaching in the Model School, those who are to receive the diploma of the institution make a faithful experimental study, in the third year of the course, of methods for presenting various subjects to children, with special reference to illustration and the use of apparatus. These exercises by the Seniors are with classes of children, and the efforts of each teacher are observed and afterwards commented upon by his classmates, as well as by the President, under whose eye and general direction this teaching is done.

ADVANCED PEDAGOGY.

This department was organized one year ago, and was sustained during the ensuing fall and winter terms. It consists, in the main, of lectures, supplemented by auxiliary lines of reading. Hereafter it will extend over the entire school year. The design of the course is to give advanced pedagogical training to graduates of this and other institutions, and to such under-graduates as are fitted by scholarship and teaching experience to derive benefit from it. In determining what under-graduates of this and other institutions shall be eligible to this course, age, experience, and documents will be taken into consideration. In lieu of other satisfactory evidence of fitness, an examination will be required.

The work to be offered during the ensuing year may be classified as follows:

1. The principles of primary instruction.
2. The science of methods.
3. A full pedagogical treatment of the various common school studies, as Reading, Arithmetic, Geography, Grammar, History.
4. The organization, management, and supervision of systems of schools in cities and large towns.
5. The history of education.
6. The application of psychology to the work of teaching.

One lecture per week will usually be given in each subject, but not more than two lectures are likely to be delivered on any one day. General and special reading will be marked out in connection with each course, and on some subjects a syllabus of the lecture will be furnished to the student.

There will, from time to time, be oral and written tests upon the work passed over. At the close of the year, those who have satisfactorily completed the course will be granted certificates to that effect.

REMARKS UPON THE LECTURE COURSE.

As a basis for the study of the principles of primary education, *Frabel's View of Education* will be examined. The aim of education, its governing laws, its organization into a system, and the means to be employed in reaching the ends desired will be prominent topics of investigation. These underlying principles will then be applied to the subjects taught in the primary schools, viz.: Reading, Number, Geography, Language.

2. The science of education must be approached from two sides: first, the nature of the child to be educated; and, second, the nature of the subject

to be taught. The lectures upon the science of methods will show how method in teaching must be determined by the very nature of the child's mental activity. They will seek to discover and exhibit the general laws of correct methods through an analysis of the activities involved in learning.

3. It has been said above, that the science of education must be approached from two sides: First, the nature of the child to be educated; and, second, the nature of the subject to be taught. The Pedagogy of the principal common-school studies deals with this second topic. The lectures are given by the heads of the various departments, and constitute the greater part of the work. They consider at length such questions as the following: 1. What are the essential or governing ideas in this subject? 2. What is the natural order of their development? 3. What phases of this organic arrangement correspond to the various phases in the development of the child; or, in other words, what would an ideal course of study show in each grade, so far as the subject is concerned? 4. What is the history of this study in school education, as to its introduction and development as a part of the curriculum, and as to the development of methods of teaching it? 5. What is the specific educational value of this subject in the discipline of mind and in practical usefulness? 6. What is its relation to the other subjects of the curriculum?

4. No topic of practical pedagogy can be of more immediate interest to the prospective school superintendent than the organization, management and supervision of city school systems. The lectures upon this subject will seek the underlying principles of such organization and management, and will direct the student's attention especially to the study of such school reports as those issued by Dr. William T. Harris while superintendent of the St. Louis public schools.

5. The lectures on the history of education trace the growth of educational ideals, showing how these are determined by national institutions and modes of thought, and also how these ideals in turn help to shape the further development of national life. Special attention will be given to the growth of modern pedagogical doctrines, notably those of Comenius, Rosseau, Pestalozzi, Herbart, and Froebel on the continent, and those of Locke, Bain and Spencer in England. The central and determining principle of each educational movement or system is sought and carried to its logical conclusion. These principles are then articulated and exhibited in their organic development. The history of education is thus no longer a chaos of unrelated or repeated facts, but an organic whole, capable of being understood and remembered. Students will be expected to read some manual of the history of education in connection with the lectures.

6. In the application of psychology to the work of teaching, there may be expected a comparative view of the various schools of psychological thought, together with an estimate of the pedagogical value of each. The philosophy of observation in the early stages of instruction will also receive special attention.

PHYSICAL CULTURE.

In the past year, instruction and drill in gymnastics were given during the months of February and March to such of the students as desired it.

Exercises were mainly given with light wooden wands and dumb bells, and were arranged and practiced in such a way that their introduction into the school room by those who received instruction in them will be easy. Thus the gymnastics were made to conform to the main purpose of the University, while furnishing diversion for those who wished merely exercise and recreation.

Instruction was given by Professors Manley, Barton and Miss Pennell. It is expected that the work will be continued next year.

ADMISSION.

The Institution is intended for the training of young persons of both sexes, for teachers in the schools of Illinois.

Students seeking admission to the University should make application to the School Superintendent of the county in which they reside. They are required—

1. To be, if males, not less than 17, and if females, not less than 16 years of age;
2. To produce a certificate of good moral character, signed by some responsible person;
3. To sign a declaration of their intention to devote themselves to school-teaching in this state, as follows:

“I hereby solemnly declare, that my purpose in attending the Normal University is to fit myself for teaching in the schools of Illinois, and that I will carry out this pledge in good faith; and I do further pledge myself to report to the President of the University, semi-annually, where I am and what I am doing, for three years after graduating at said Institution.”

4. To pass a satisfactory examination before the proper officer (County School Superintendent), in reading, Spelling, Writing, Arithmetic, Geography, United States History, and the elements of English Grammar.

EXTRACT FROM THE NORMAL UNIVERSITY ACT.

SEC. 7. Each County within the State shall be entitled to gratuitous instruction for one pupil in said Normal University, and each Representative District shall be entitled to gratuitous instruction for a number of pupils equal to the number of representatives in said district, to be chosen in the following manner: The School Superintendent in such county shall receive and register the names of all applicants for admission to said Normal University, and shall present the same to the County Court, or, in counties acting under township organization, to the Board of Supervisors; said County Court or Board of Supervisors, as the case may be, shall, together with the school superintendent, examine the applicants so presented, in such a manner as the Board of Education may direct, and from the number of such as shall be found to possess the requisite qualifications, such pupils shall be selected by lot; and in representative districts composed of more than one county, the School Superintendent and County Judge, or the

Chairman of the Board of Supervisors in counties acting under township organization, as the case may be, of the several counties composing such representative district, shall meet at the Clerk's office in the County Court of the oldest county, and from the applicants so presented to the County Court or Board of Supervisors of the several counties represented, and found to possess the requisite qualifications, shall select, by lot, the number of pupils to which said district is entitled. The Board of Education shall have discretionary power, if any candidate does not sign and file with the secretary of the Board a declaration that he or she will teach in the public schools within this State, in case that engagement can be secured by reasonable efforts, to require such candidate to provide for the payment of such fees for tuition as the Board may prescribe.

Candidates should show a knowledge of the branches in which they are examined, sufficient to entitle them to a second-grade certificate.

[AMENDED, February, 1861.]

SEC. 4. Each county in this state shall hereafter be entitled to gratuitous instruction for two pupils in said University, to be selected as provided in Section 7 of the act of which this is an amendment.

If any county or representative district neglects to make an appointment, the President of the University is, by a resolution adopted by the Board of Education, authorized to fill the vacancy by appointing some person of proper age and qualification. Every such person must pass, before the faculty, an examination in the same subjects as in that required before the County Superintendent in other cases. But no one will be admitted who does not attain an average of 60 per cent. on the preparatory work. Persons holding first-class certificates are excused from examination.

SUGGESTED FORM OF CERTIFICATE.

I hereby certify that I am well acquainted with.....
and know him (or her) to be a person of good moral character.

In case the School Superintendent is not able to make the above certificate himself, something like the following endorsement should be appended by the School Superintendent:

I am well acquainted with.....who signs the above certificate, and believe him to be an entirely trustworthy man; and, so far as I know and believe, the above named applicant is a person of good moral character.

By vote of the Board, the President is authorized to admit suitable persons by examination, so long as the school is not filled with regular appointees.

Any teacher in the State is welcome to come here at any time, to remain as long as he pleases, to visit any of the classes and laboratories, and to observe any of our work—all without enrollment or responsibility. If he is enrolled as a student, he is expected to follow our regular Course of Study, provided always that he will be excused from pursuing any study further,

after attaining a standing of 85 *per cent.* on a rigid examination in the same. Occasionally an experienced teacher, by special arrangement, is allowed to pay tuition and select studies to a certain extent, but every such case is decided on its individual merits; we have no general rule to this effect.

No person will be entitled to graduate who does not make the required standing in each study of the course—either by work in the class-room, or by examination as described above. Any person is entitled to our diploma who shall have completed our required Course of Study, without regard to the time he may have spent here; provided, that his residence shall not be less than one year, and that his deportment and character shall be satisfactory to the Faculty.

We transfer to our books no mark of standing from other institutions.

New students are received at the beginning of every term. It is important that they should be present on the *first* day of the term, as the regular recitations invariably begin on the *second* day. Failure to be present on the first day does not debar one from the privilege of joining the school; but every day of delay in entering greatly increases the difficulties of the beginner's work.

By a law, passed during the last session of the Illinois Legislature, graduates from the Normal Department will hereafter be entitled to receive a State certificate good for five years.

MODEL-SCHOOL DEPARTMENT.

THE MODEL DEPARTMENT was established in order that there might be a school exhibiting the best methods of teaching, discipline and classification, which the Normal students should visit, and in which they should take part as instructors. It is intended that the Course of Study in its several grades shall embrace all that belongs to a thorough education, from the elements up to a preparation either for college or for business.

This department is divided into four Grades—the High, Grammar, Intermediate, and Primary schools. Each of these is under the direct charge of an accomplished and efficient principal, who is assisted in part by permanent teachers, and in part by pupil-teachers from the Normal school. The work of the latter is subjected to careful supervision and guidance.

The Classical and General Courses are thorough and extended. Our young men and women enter college well prepared.

The accompanying plans of study will give a general idea of the subjects to be pursued in the several grades, and of the time allotted to each. It will be observed that two distinct courses are arranged for the High School; one to prepare students for college, and the other for general business. The two, however, are made to blend whenever practicable.

The only requisites for admission are a good character, and a tuition fee of \$32 per year in the High School, \$25 in the Grammar School, and \$15 in the Intermediate Grade. Pupils, after being examined, are classed according to their attainments.

Boys and girls from abroad may be confidently intrusted to the care of the Principals; and, if desired, a monthly report of scholarship and deportment at school will be sent to the parents.

A second year in German is optional.

Opportunity is offered to any who wish to take lessons in Short-Hand and Type-Writing. A reasonable fee is charged to those students who choose to take this course.

GRAMMAR SCHOOL GRADE.

The Grammar Grade is a school for those who wish to prepare for the Normal or High School, or for General business.

Young men and women not fully prepared, who wish to enter the Normal Department, are enabled to do so by spending a term or two in the rigorous preparatory drill of the Grammar School; while, to those who are preparing for the High School, it offers excellent academic training. It is in the direct charge of a Principal, and his assistant teachers are under the constant supervision of the Principal Training Teacher.

Pupils often fail in their effort to get a higher education, simply because their elementary education has been poor; hence, great care is taken that each one be well grounded in elementary knowledge.

Those who wish merely a common-school education will find the course comprehensive enough for all ordinary business purposes. Much care is taken that pupils shall become good penmen, and that they shall acquire such ready knowledge of arithmetic that they may make good accountants. Those more advanced will have the opportunity of studying book-keeping, taught according to the most practical methods.

The grading is such that pupils may take the work which they are best fitted to do; and, during the second year, such as can do so are allowed to take any of the languages in the High School.

The moral influence of the school and town is good. Vicious boys who are outcasts from other schools will not find admittance here. Saloons and other places of evil resort are not allowed in the town.

FIRST YEAR.

READING.—Give careful attention to expression, and to quality of voice. See that the pupil reads as he talks. Drill the eye on the quick recognition of words. Much supplementary reading.

SPELLING.—Written.—Select words that are interesting and practical from different spelling-books, other text-books, and from newspapers. See that the pupil keeps a careful record of corrected words, makes frequent copies of the same, and applies three "Rules" for spelling.

LANGUAGE—INDUCTIVE LANGUAGE LESSONS, GREENE.—Supplementary work continued. Letter writing. Require frequent written exercises.

GEOGRAPHY.—Continue tracing, sketching, and work from reference books. Great pains taken to make the descriptive work picturesque.

SCIENCE.—Zoology substituted for Language one term. The study of both living and mounted specimens. The pupil's powers of observation trained. Original investigation stimulated. Careful notes kept by each pupil. JOHONNOT'S Natural History Series used.

ARITHMETIC.—Finish WALTON'S INTELLECTUAL. In plan and purpose continue the work of the preceding year. Begin WALTON'S WRITTEN. Decimal Fractions. Compound Numbers.

WRITING OR DRAWING.

SECOND YEAR.

READING.—Fifth Reader. Thought analysis. Careful study of expression. Lead the pupils to admire and appreciate what is pure and lofty in literature. Let them exercise their taste in selecting and memorizing what is most beautiful, whether in poetry or prose.

SPELLING.—Continue work of previous year.

LANGUAGE.—Composition work continued. Analyzing. Original stories. INDUCTIVE LANGUAGE LESSONS, GREENE. Complete the work to Part II.

GEOGRAPHY.—GUYOT'S GRAMMAR-SCHOOL.—Comparative and Mathematical Geography.

ARITHMETIC—WALTON'S WRITTEN.—Percentage (Interest, Partial Payments, Discount, Profit and Loss, etc). Much oral drill on the foregoing.

SCIENCE.—Physiology substituted for Geography.

Names of parts of the Human Body. Experiments showing the functions of the parts. Care of the organs. Principles and laws underlying respiration, circulation, and digestion, established by the pupils own work.

THIRD YEAR.

READING.—SEVEN AMERICAN CLASSICS and other supplementary reading. Work of previous year continued. Use an application of rhetorical figures.

SPELLING.—Make a study of prefixes, suffixes, synonyms, homonyms, and easy derivatives.

GRAMMAR.—Finish GREENE'S INDUCTIVE LANGUAGE LESSONS.—
Essays, stories, prophecies, etc. Thought and grammatical analysis of some
poem, with pen-pictures in prose taken from the same.

BOOK-KEEPING:—BRYANT'S COMMON-SCHOOL.

SCIENCE.—Natural Philosophy. Levers, motion, specific gravity, heat.
(All illustrative).

ARITHMETIC.—Review.

LATIN, GERMAN.—(Optional).

INTERMEDIATE GRADE.

FIRST YEAR.

FIRST TERM.

READING.—Third Reader. Study of the long and the short vowels; their mode of representation (Webster). All new words pronounced in the class when the lesson is assigned. Natural expression of thought. Pupil reads to himself before reading aloud. Choice selections memorized.

SPELLING.—Careful attention given to Spelling in connection with Reading and Language.

LANGUAGE.—DEGARMO'S LANGUAGE WORK, No. 2, supplemented by seeing and talking-exercises from objects. Some written work (with pencils) in the class. Pains taken to secure systematic and connected thought. Neatness.

GEOGRAPHY.—Distance. Scale. Map representation. Sketching. Molding.

ARITHMETIC.—Exercises in rapid addition, subtraction, multiplication, and division. Thorough intellectual drill on oral work. Promptness. Problems in U. S. money, made and performed by the pupils.

WRITING.—Daily practice in Writing and Drawing. Special attention given to position and movement.

SECOND TERM.

READING.—Work of previous term continued. Study of diphthongs and consonants. Phonic Analysis. The children relate the story of the lesson. Proof required that the pupil understands before he is asked to read aloud. He is led to glance from the book when within a few words of the close of sentences or paragraphs.

SPELLING.—As in previous grade. Copying paragraphs from the Reader.

LANGUAGE.—Work of first term continued. Children encouraged to talk freely of what they have seen, and to relate their own experience.

(The teacher must be a good listener.) The children helped to right habits of thinking. Correct forms, whether written or spoken, to be strongly emphasized; false forms, even when under criticism, to be rarely repeated. Pupils are led to give full description of objects. (Few questions.)

GEOGRAPHY.—The continents and their relative positions. Study of a globe. Work on natural boundaries.

ARITHMETIC.—Drill work, oral and written, continued. Fractions—illustrated by the use of money, dry measure, counters, sticks or lines. No guessing allowed; that is, no opportunity given for it.

DRAWING OR WRITING.—Work of the previous term continued. In writing, more attention given to form.

THIRD TERM.

READING.—Third Reader. Sight Reading. Attention given to the meaning of new words. The pupil's acquaintance with words shown by his using them in sentences. The pupils use their own language in the explanation of sentences or paragraphs.

SPELLING.—By sound and letter. Silent letters noted. Chiefly copying, as in previous grade.

LANGUAGE.—Finish DeGarmo's Language Work, No. 2, supplemented by work in Natural Science, with mounted specimens of birds, quadrupeds, and insects.

GEOGRAPHY.—The pupil's notions of agriculture and commerce extended. Illinois. Chicago. Sketching.

ARITHMETIC.—WALTON'S INTELLECTUAL. Accuracy, neatness, and promptness. Pupils required to make problems. Drill.

WRITING.—Daily practice. Much attention given to form and neatness in all written work.

SECOND YEAR.

READING.—Fourth Reader, with occasional lessons from supplementary books and paper. Attention to suggestions made in reference to the work of the preceding grades. More frequent use of the dictionary.

SPELLING.—Written—Important words from the Reader and selected words from a "word-book" used in the grade.

LANGUAGE.—Finish DeGarmo's Language Work, No. 3, with much supplementary work.

The language hour given partly to Botany during the spring term. Familiar conversation, under the direction of the teacher, upon the nature,

growth, and kinds of plants. Each pupil keeps a careful record of his own observations on plant life. Note-books examined by the teacher and afterwards corrected by the pupil.

GEOGRAPHY.—Relief, climate, productions. Tracing and sketching of the different groups of the United States. Descriptive geography of the same. Judicious use of Gazetteer and other reference books. The work made interesting by correct mental pictures.

ARITHMETIC.—WALTON'S INTELLECTUAL.—Oral and written work. Pupils taught to illustrate and to prove, by means of lines and objects. Logical analysis required, and care taken to make the work a valuable discipline.

WRITING.—Drawing or Writing suited to grade. Pains taken to see that the pupils form right habits of position and movement.

PRIMARY GRADE.

FIRST YEAR.

READING.—Words, phrases and sentences taught by associating them directly with the objects, ideas, and thoughts for which they stand. A vocabulary of words is selected from Reading charts and the first part of several First Readers. Monroe's Chart Primer and Harper's First Reader or their equivalents, completed. Supplementary reading twice each week from blackboard, slips of paper, and the first half of one or two First Readers.

SPELLING.—First by sound, then by letter, words selected from reading lessons.

WRITING.—Training in the proper use of the hand and arm. Practice in making the straight slanting line, the right and left curves, and in combining them into letters and words. Pupils' names. Copying in script, lessons from the Reader.

NUMBER.—Numbers as wholes and the relations in each through *ten*. Fractions through *tenths*. Objects used with all processes until the number relations are learned. The units of measures, in so far as they are involved in number not higher than ten. Children obtain their ideas of these measures through the use of objects. Figures and signs taught, after the numbers and their relations are understood.

LANGUAGE.—Oral reproduction of stories and simple descriptions, read or told by the teacher. Descriptions of objects present to the senses. Facts learned in other studies, used as subjects of language lessons.

DRAWING.—The form models made use of are the sphere, the cube, the cylinder, the square prism, the hemisphere, and the right triangular prism. The tablets and figures derived from these are the circle, the square, the oblong, the semi-circle and the triangle.

The work is as follows: 1. The presentation of the form models—(*a.*) as to wholes; (*b.*) as to surface; (*c.*) as to faces; (*d.*) as to edges; (*e.*) as to corners. 2. Molding these forms in clay, also irregular forms based upon these. 3. Cutting from the molded form the devised tablet. 4. Tablet and stick laying. 5. Drawing on the blackboard and on paper. 6. Paper-folding, cutting, and weaving. Development of color sense by use of colored forms, papers, etc.

SECOND YEAR.

READING.—One Second Reader completed. Supplementary reading from the second part of several first readers.

SPELLING.—Work of first year continued. Words and sentences written from dictation.

WRITING.—Hand and arm training continued. Further practice in making small letters. Analysis of capital letters commenced. Writing in copy-book throughout the year.

NUMBER.—Study of numbers through *twenty*. Fractions through *twentieths*. Roman numerals as high as numbers are learned. Objects used in presenting new ideas, and in all processes where the number relations cannot be perceived without them.

LANGUAGE.—Work of first year continued. Oral and written descriptions of people, animals, plants, and other objects studied during the year. Exercises in copying and dictation. Letter-writing commenced. DeGarmo's Language Book, No. 1, placed in the hands of the children.

GEOGRAPHY.—Children started in the study of the people, animals, and plants of the different regions of the earth. Geographical elements commenced.

DRAWING.—New forms introduced are the ellipsoid, the ovoid, the cone, the square pyramid, the vase form, and the equilateral triangle. During the spring term forms of leaves are observed and drawn. The new terms are, *Latin cross*, *Greek cross*, *Maltese cross*, *bisect*, *trisect*, *parallel*, *oblique* and *angle*. Cutting of forms and original arrangement of patterns. Clay molding of typical forms and of irregular objects based upon these forms. Drawing of patterns and of views of objects.

THIRD YEAR.

READING.—One Third Reader completed. Supplementary reading from Second Reader, papers, and magazines.

SPELLING.—Work of previous years continued. Paragraphs written from dictation.

WRITING.—Continuation of work begun in first and second years.

NUMBER.—Work of second year continued through *one hundred*. Wentworth & Reed's First Steps in Number, or similar book, placed in the hands of the class.

LANGUAGE.—Work of second year continued. Short selections and entire productions read by children and reproduced in substance. Selections from poetry memorized. DeGarmo's Language Book, No. 2, placed in the hands of the children.

GEOGRAPHY.—Work in second year continued. Idea of map given by lessons upon school-room, school-yard, village, and county.

DRAWING.—Work of first and second years reviewed. Book No. 1 of Prang's Series introduced.

ADDITIONAL INFORMATION.

Thorough DISCIPLINE will be enforced in every department of the University.

Experience has shown it to be necessary that a perfect understanding should exist between the President and those with whom the students board, in respect to the habits and conduct of students in their rooms.

BOARD, in good families, costs from \$3.00 to \$4.00 a week, exclusive of fuel, lights, and washing; when the fuel and lights are furnished the charge is a little more.

The expense of board is reduced about one-half by boarding in clubs, and by self-boarding. Rooms can be secured at reasonable rent in the village.

The following may be considered a near approximation to the necessary EXPENSES for one year, exclusive of pocket money, apparel, traveling, and board in vacation:

Board, 39 weeks,	-	-	-	from \$78 00 to \$156 00
Washing,	-	-	-	" 15 00 to 25 00
Books and Stationery	-	-	-	" 10 00 to 15 00
Total,	-	-	-	\$103 00 to \$196 00

TUITION IS FREE in the Normal Department, to those who take the pledge to become teachers in Illinois.

Students are advised to bring with them such books as they may have, but not to purchase others until they arrive at the University. Students arriving on the I. C. and C. & A. railroads should come to Normal station; those arriving by other roads can reach Normal from Bloomington by street cars. In no case is the hiring of a carriage necessary.

The APPARATUS is excellent in quality, and sufficiently ample for the ordinary purposes of illustration.

A CERTIFICATE is granted for the successful completion of one year's work, and another for that of two years.

There are TWO LITERARY SOCIETIES, the Philadelphian and the Wrightonian, each of which has a well-selected library.

The MUSEUM and the room for Microscopic work are in the University building, and to these the students of the University have access under suitable restrictions.

The special Summer Term for Teachers has been discontinued for the present.

N. B.—The statements made in this catalogue are to be interpreted *literally*.

ADVERTISEMENT.

The preceding pages show that the State Normal University offers excellent advantages to persons desiring to pursue any one of four distinct lines of study.

I. THE NORMAL SCHOOL.

The work of the Normal School is the central thought of the University—it is for this that the University exists—all the other departments were established to assist in doing the work. Nevertheless, the other departments will serve well the purpose of those wishing instruction in their several fields, even though they have no design to become teachers.

The sole purpose of the Normal School is to prepare teachers for the schools of the State. It will be seen that its pupils are instructed and drilled both in the things to be taught and in the methods of teaching. The usual time necessary to complete a full course is three years; yet, if pupils can show by a thorough examination that they are fully prepared on any of the studies in the course, they will be excused from pursuing those studies. On the other hand, no student will be allowed to pass a study until he has accomplished a certain result, no matter how much time he may have given to it.

II. TRAINING WORK.

This makes a large part of the *strictly professional* work of the Normal School, and all who graduate from the Normal School must take the full course. But, by the recent action of the Board of Education, any persons who are found to be prepared may take the professional study and practice *alone*, and receive a certificate for work successfully done. This offers to the teachers of the State an opportunity for strictly professional improvement, of which it is hoped many will avail themselves. See also page 46.

III. SCIENTIFIC DEPARTMENT.

Our facilities for the study of Botany, Zoology, Geology, Chemistry, and Mineralogy, are excellent; and we now offer them to such as desire to make these studies a *specialty*, at a very small cost.

IV. MODEL DEPARTMENT.

This school, in its several grades, offers great advantages for obtaining academic instruction of any grade below that of our best colleges; and it will be observed that the cost of tuition is very low. Pupils completing the work of the High School are allowed to graduate and receive the formal diploma of the Institution.
